

Mock Line Strike: Equipment Sponsor (2018)

SC811 is excited to have the Mock Line Strike return to South Carolina. The Mock Line Strike demonstration covers a complete excavation lifecycle from making the one-call, line locating, proper excavation tactics, line strike and emergency/operator response to the line strike. The forum is set on an excavation site and representatives from each stakeholder group speak on each topic during the excavation lifecycle. Education through Demonstration is designed to transform the contractors' experiences, improve reach and create the critical connections necessary to prevent a pipeline incident.
